

Section aa-US50 shown.
Ideal for creating single module islands

The aa-US range of Upstands are ideal for creating 'island' ceilings and 'floating ceilings' where the Upstand Channel forms a frame around a ceiling area and is suspended either directly from the soffit or below an existing ceiling. In addition the suspension can be set back from the profile edge enhancing the floating island effect.

These profiles create ideal aesthetic solution whilst maintaining all the acoustic benefits of the ceiling tiles.

The Upstand trims come with a range of accessory products which ensure that installation is achieved efficiently.
